

# NATIONAL COMPOSITES

National Composites, is a multi-plant OEM supplier of custom FRP and thermoformed products. We offer the convenience, engagement, and focus of a small production facility, but with the resources, reliability, knowledge, and diverse capabilities of a large corporation. We are a “one-stop shop” when it comes to FRP and thermoformed product, we assist on product design (as needed), pattern build in house, prototyping, tool and fixture build in house, a multitude of molding capabilities, fixtured trim and finish capabilities with multiple SKU’s, and a full assembly group dedicated to value-add component installation and assembly.

National Composites unique approach to the market has allowed us to become specialists and industry leaders in the markets we serve. Each plant is dedicated to being the best in their field, solely focusing on specific market segments. With this focused approach, our production staff are able to become true craftsmen of their trade and our sales and engineering staff become your true partners, providing design and engineering assistance. The leaders of our multiple production plants have decades of experience in composites serving multiple different markets and working with a variety of different materials and molding techniques. At National Composites we strive to deliver more than just quality products, we are dedicated to being a true partner with people you can rely on.

We at National Composites believe in the people, vision, and end products of Zeus Electric Chassis. We take pride in the quality and reliability of our work and are happy to partner with a company that shares that same attention to detail. National Composites is committed to the growth and success of Zeus Electric Chassis.
